MODULE 03 | VERSION 3.0

Client Acceptance & Budget

Governance-aligned controlled consolidation | 25 October 2026

DOCUMENT CONTROL	APPLICATION
Status	Harmonized business specification; approved prior module workflow retained with controlling Module 7 alignment.
Composition	This V3 addendum and the full previously revised module source are combined in a single PDF.
Priority	This V3 alignment governs in case of conflict. The original module source remains operative where not contradicted.
Central governance	Module 7 is a continuous operational backbone; it is not a gate to be completed after Module 6.
Authority	Documented GM-led delegation and owner-reserved matters replace generic or inconsistent old “Management alone” labels.
Scope of this module	Versioned project plans and budget proposal through exact-version client acceptance, independent finance gate and explicit Module 4 release.

1. Implementation interpretation and source preservation

This document intentionally retains the complete existing revised module specification after this amendment. Do not erase earlier workflow, screenshots, forms, stages or user-approved protections. Configure the shared functions from the V3 Master Architecture and Module 7 specification. The addendum is not permission to skip work or approvals.

2. Shared mandatory company controls

- GOV-01 Governance: The owner retains reserved strategic powers and protected oversight, while the employed General Manager (GM) holds company-wide operational accountability. Owner access to reporting does not authorize routine operational interference.
- GOV-02 Delegation: Department heads, Project Managers and designated officers may authorize decisions only within documented project, function, category, value and risk limits; above-limit or exceptional decisions go to GM. No employee may approve their own originating action.
- GOV-03 Technical independence: Valid safety and professional certifications are performed by competent authorized persons; neither a GM nor a financial waiver can substitute for a mandatory technical/statutory clearance.
- GOV-04 Evidence: Worker, junior designer, client, storekeeper, inspector, supplier and auditor original submissions are preserved with authorship, timestamp, linked versions and tamper-evident history. Review adds new records; it does not overwrite originals.
- GOV-05 Segregation: Requests, verification, approval, payment, receipt and audit must be appropriately independent. Where team size makes perfect separation impractical, a documented compensating review by an independent qualified officer is mandatory.
- GOV-06 Client access: Client portal content is limited to that client/project and expressly published revision; source design files, worker complaints, confidential pay, internal contracts and audit cases remain restricted.

- GOV-07 Controls: Accounts verifies funds/beneficiaries and books actual transactions; QS values cost and forecasts; Contracts verifies commercial entitlements; Compliance oversees obligations; QA checks systemic quality; independent audit observes, investigates and independently verifies closure.
- GOV-08 Exceptions and continuity: Documented financial/administrative exceptions may be decided by the authorized delegated manager or GM; there is no exception to mandatory law, safety, professional status or an already-required client acceptance. GM absence invokes only preapproved and HR-activated acting authority.

3. Updated operating workflow and stage gates

Budget approval

Lead QS approves technical estimate; delegated management separately authorizes client release of summary and permissioned detailed budget.

Client acceptance

Client portal sign-off or uploaded signed paper acceptance of exact proposal version, with evidence and identity.

Verification

Delegated management independently verifies client acceptance and signed scope; unauthorized acceptance never advances stage.

Finance

Accounts independently verifies actual received net payments and milestone conditions from reconciled records; reminders only manually dispatched by Accounts.

Release

Management formally authorizes Module 4 once acceptance and financial gate pass; properly documented financial exception permitted, debt remains outstanding.

4. Module-specific accountability integration

CONTROL AREA	REQUIRED V3 BEHAVIOR
Budget content	QS accountable for pricing and quantities; detailed schedules visible only by explicitly authorized role/client permission.
Client acceptance	Contracts verifies legal identity/terms when risk warrants; manager validates acceptance record, no superseded revision acceptance.
Client receipt	Accounts receipts only confirmed transaction, reconciles bank/M-Pesa, posts ledger; no self-authorized write-off.
Financial waiver	Only authorized manager/GM may approve eligible documented milestone exception; financial exception cannot waive statutory obligations.
Client reminders	Manual Accounts decision to send; notification service may prepare draft, not automatically issue arrears reminders.

5. Conflict resolution register

OLDER / AMBIGUOUS WORDING	V3 INTERPRETATION
“Management alone” publishes and releases	Delegated manager authorized for category/threshold may act; GM handles exceptions; owner not routine approver.
Generic “Accounts” receipt field	Use central Module 7 finance ledger, receipt verification and customer balances.

6. Developer data extensions / shared links

Maintain one stable ProjectId across all modules; preserve exact FileVersionId and client publication authorization, verify role scope server-side and append actor/timestamp/decision history for every state transition.

- BudgetSummary/BudgetDetail
- ProposalSnapshot
- ClientAcceptance/SignatureEvidence
- ClientPaymentMilestone
- Receipt/PaymentVerification
- FinanceException
- ModuleRelease
- PublicationGrant
- AuditEvent

7. Mandatory integration acceptance tests

AT-03-01: Client cannot accept a superseded proposal revision as current.

AT-03-02: Client sees detailed budget only when permission granted.

AT-03-03: Unverified or duplicate payment reference cannot satisfy gate.

AT-03-04: No automatic overdue reminder is sent without Accounts initiation.

AT-03-05: Waiver of milestone records outstanding receivable and does not waive statutory hold.

AT-03-06: An officer without delegated release permission cannot open Module 4.

8. Required developer references

Read this PDF with 00 Master Architecture, Module 07 Central Administration and 08 Integration & Testing. Additional authoritative user decisions for Modules 1-6 prevail over older illustrative implementation examples where the later decision is more specific. Regulatory obligations must be validated with qualified advisors and current official sources before implementation.

MATHMAG BUILDERS LIMITED

MANAGEMENT SYSTEM

MODULE 03

CLIENT ACCEPTANCE & BUDGET

Versioned proposal • Formal client approval • Management verification • Accounts release gate

Plan better, build better.

Organization	Mathmag Builders Limited
Purpose	Revised developer-ready functional specification
Revision	2.0 | 24 October 2026
Approval basis	Confirmed business choices + clearly identified technical implementation recommendations
System scope	Module 03 of 06, on one persistent client/project platform

IMPLEMENTATION RULE

This revision replaces inconsistent stage assumptions in earlier drafts. A confirmed business decision is binding; illustrative fields, example APIs and implementation details must be validated in design review.

01 Purpose and main approval boundary

Controlled presentation and acceptance of the planning package and budget, followed by management-verified financial release.

Planning intake	Receive exact released Architecture, Structure, Mechanical, Electrical and QS package versions from Module 2 as contracted.
Budget views	Prepare summary and detailed budgets; detailed access is restricted and explicitly published only where authorized.
Technical budget approval	Lead QS reviews and approves cost estimate technically before client publication.
Client publication	Management alone authorizes the proposal version and precise files/budget views visible to the client.
Client acceptance	Portal acceptance OR uploaded genuine client-signed form linked to specific proposal snapshot.
Acceptance verification	Management verifies every client acceptance before any release.
Payment check	Accounts verifies agreed payment milestone; management can approve a documented permitted payment exception.
Module 4 release	Management gives separate affirmative release after acceptance and financial gate.

MANDATORY CONTROL

A viewed proposal, meeting note or verbal assent cannot be treated as formal approval. Approval and payment clearance are distinct gates.

02 Process from planning package to released proposal

01	Module 2	Submit locked, coordinated design and approved budget package.
02	Lead QS	Certify technical completeness/consistency of cost summary and detail.
03	Management	Select exact proposal revision and explicitly authorize client publication.
04	Client	Review portal or physical/virtual meeting and request changes or formal acceptance.
05	Affected Departments	Process revisions under Module 2 approval and impact control if required.
06	Client	Accept exact published version through portal or signed acceptance form.
07	Management	Verify client identity, approval evidence, content and any conditions.
08	Accounts	Verify contractually agreed payment milestone, receipts and balances.
09	Management	Authorize Module 4 release, or record reasoned eligible financial exception.

03 Responsibility matrix and separation of duties

Lead Quantity Surveyor	Technical review of budgets and estimating revisions; cannot independently publish a proposal to client.
Management	Authorizes publication, controlled detailed-budget visibility, client acceptance verification, any permitted payment exception and Module 4 release.
Accounts Department	Records/verifies client payments, receipts, statements, balances and manual reminder timing; no power to waive financial gate.
Client Relations Officer	Coordinates meetings/comments; cannot impersonate client signature or approve proposals.
Discipline Leads	Assess and formally release design corrections required by client feedback.
Client	Can accept only their own selected published version; may use secure portal or signed document.
System Administrator	Maintains roles and technical setup but does not acquire business approval merely from administrator privilege.

04 Proposal snapshot and cost presentation

• Build a read-only proposal snapshot referencing approved drawing revision IDs, approved QS estimate revision, scope inclusions/exclusions and document manifest.

• Generate client proposal summary plus supporting documents; keep the detailed QS budget internally unless management explicitly allows the client a detailed view.

• Store separate timestamps for upload, technical approval, management publication, client access, acceptance and subsequent supersession.

• Provide clear version label on client review screens and sign-off forms so accepted documents cannot be confused with newer alternatives.

• Prevent direct file download through guessed URLs, cached links or copied share links after publication access is revoked.

• Retain historical proposal versions after revision; do not erase a version accepted by the client.

05 Client review and acceptance routes

Portal route

• Authenticated client views authorized PDFs/images and the approved pricing view, submits comments and explicitly signs/accepts the exact package.

• Record authenticated identity, acting capacity, acceptance wording, date/time, version hash and acceptance receipt.

Meeting and signed-form route

• Staff records physical/virtual review meeting, version actually presented, comments and minutes; meetings alone do not imply acceptance.

• Upload signed acceptance form with identity and signature evidence, identify exact proposal revision and assign verification to management.

Management verification

• Check client authority, file/scope match, accepted costs, any qualifications, outstanding design corrections and authenticity of evidence.

• Statuses include Pending, Verified, Returned for Clarification and Rejected, each with recorded reasons.

06 Proposal changes after presentation or acceptance

01	Change Requested	Client or technical team submits specific change with reason and relevant proposal version.
02	Impact Triage	Lead Architect and other affected disciplines assess scope and need for major revision approval.
03	Cost Revalidation	QS estimates pricing impacts and Lead QS approves updated cost outputs.
04	Management Review	Approves any major redesign commercial consequence and publication of revised proposal.
05	Client Review	Receives exact updated issue and renews acceptance when change materially affects prior accepted scope.
06	Acceptance History	Original acceptance remains preserved, linked to new version and supersession record.

07 Accounts and payment milestone controls

• Accounts verifies incoming payments against reliable channel evidence, project fee category and unique transaction reference; duplicate reference checks required.

• Receipts and statements may be published to the client portal and optionally shared via configured WhatsApp/email channels.

• Timing of financial reminders is manually controlled by Accounts (confirmed policy); the system may assist with drafts/queues but must not send at a hard-coded automatic cadence.

• Module 4 financial gate tests the specific agreed planning/approval service milestone, not necessarily the entire overall design/build contract price.

• Only management can authorize a permitted payment exception, with reason, scope, conditions and timestamp. Such exception never overrides mandatory statutory requirements.

• Part-payments, overpayments, reversals, refunds and reallocations require traceable financial adjustments rather than edits to historical receipt rows.

08 Contract and service pathway integration

• Module 3 acceptance is acceptance of a defined plan/budget proposal; it is not automatically a construction contract or authority for mobilization.

• Clients who select drawings/printing only or own-builder design services can terminate the engagement at their contracted milestone without being forced into full approval/build flows.

• Later service add-ons (approvals, inspection, supervision, labour or full construction) must open controlled commercial requests in Module 5, approved by management.

• If detailed budgets are restricted, the accepted proposal should still clearly show the client-facing financial scope and obligations they are agreeing to.

• When construction variations later revise budget/scope, keep original planning proposal frozen and link revised financial commitments to Module 6 variation records.

09 Module 4 release conditions

Technical package	Each contracted planning discipline and Lead QS cost package has a released version.
Management publication	Exactly accepted client-facing files were authorized for publication.
Client acceptance	Valid portal acceptance or verified signed form for exact proposal revision.
Management verification	Positive decision that resolves outstanding acceptance issues.
Financial milestone	Accounts-confirmed milestone received or reasoned management exception within legal/contractual limits.
Release decision	Explicit management action creates Module 4 task; no automatic release on receipt alone.

10 Shared rules carried across all six modules

One lifecycle record	Maintain one project ID from confirmed site-visit booking through design, approvals, contracts, construction and post-handover. Never create a disconnected project just to open a new module.
Role separation	User role, project assignment and explicit approval authority determine every permitted action. Technical sign-off, financial validation, management approval and client acceptance are distinct records.
Evidence integrity	Preserve original submissions, attachments, timestamps, authors and immutable decision histories. Corrections create new records or versions; no silent overwriting.
Selective client access	Client accounts can access only their own projects and explicitly authorized files or updates. Internal working/source files, staff performance data and financial notes are never published by default.
Conditional service scope	Clients may purchase design only, printing only, approvals, technical supervision, labour-only building or full construction. Modules not contracted are not mandatory project steps.
Management-controlled exceptions	Any permitted exception requires identified management authorization, reason, date and retained evidence. Mandatory legal/technical clearances cannot be overridden.
Security and audit	Require authenticated accounts, least privilege, encrypted transport/storage, file scanning, access logs, project-scoped permissions, backups and recoverability.

11 Screens and user journeys

Proposal Assembly	Version-locked design/budget manifest, inclusions/exclusions and publication preview.
QS Budget Approval	Summary/detailed views, quantities, source revision, lead approval and rework.
Management Publication Queue	Per-file visibility, access control, approval and revocation history.
Client Proposal Review	PDF/image viewer, comment request, acceptance and signed-form status.
Management Acceptance Verification	Compare exact accepted snapshot with published versions and signatures.
Accounts Payment Desk	Transactions, receipt verification, statements, manually scheduled reminders.
Release Control	Audit-friendly gate checklist before Module 4 activation.
Management Analytics	Acceptance turnaround, proposal changes, budgets pending release and overdue payment flags.

12 Core data objects and key relationships

Logical entities for developer schema design. Names below are examples rather than prescribed database table names.

ProposalSnapshot / ProposalDocument	Project, released package IDs, budget version, summary/detail visibility, source hashes.
ClientReview / Comment / Meeting	Participants, date, shown proposal version, change requests, source attachment.
AcceptanceEvidence	Portal action or scanned signed form, client identity, version, signature, timestamp.
ManagementAcceptanceDecision	Approval, conditions, reviewer, reason, date, revision linked.
FinancialMilestone / ClientPayment	Amount due, date, receipt channel/reference, verification, balance.
PaymentException / ModuleRelease	Approving manager, reason, financial status, stage release time.
RevisionImpact	Source discipline change, pricing impact, client reacceptance obligations.

13 Illustrative service and event contracts

Suggested API/service boundaries for planning. Authentication, validation, permission checks, idempotency and audit metadata apply to all write operations.

Create proposal snapshot	POST /projects/{id}/proposals/from-planning with approved document references.
Approve budget	POST /estimates/{rev}/lead-qs-approval.
Management publish	POST /proposals/{rev}/publication-grant.
Client accept	POST /proposals/{rev}/client-acceptance (portal or authorized uploaded evidence).
Verify payment	POST /projects/{id}/payments/{txn}/verify.
Release Module 4	POST /projects/{id}/module4/release with management gate evidence.
Events	ProposalPublished, ClientAccepted, ClientAcceptanceVerified, MilestonePaid, Module4Released.

14 User acceptance tests and release criteria

• TEST 01 - Reject proposal publication without Lead QS approved budget and positive management publication authorization.

• TEST 02 - Allow management to publish summary budget while detailed budget stays inaccessible to client.

• TEST 03 - Accept both secure portal and client-signed uploaded acceptance, and reject mismatch to proposal version.

• TEST 04 - Management verification must exist for every acceptance, including signed-form route.

• TEST 05 - Block Module 4 release on unpaid milestone unless permitted management exception is properly recorded.

• TEST 06 - Accounts can issue receipts/statements but cannot approve financial exceptions.

• TEST 07 - Reminders do not auto-send at a hard-coded frequency; Accounts explicitly schedules/sends them.

• TEST 08 - Accepted proposal is immutable after change; revisions create new client acceptance route where required.
