MODULE 04 | VERSION 3.0

Printing, Stamping & Statutory Approvals

Governance-aligned controlled consolidation | 25 October 2026

DOCUMENT CONTROL	APPLICATION
Status	Harmonized business specification; approved prior module workflow retained with controlling Module 7 alignment.
Composition	This V3 addendum and the full previously revised module source are combined in a single PDF.
Priority	This V3 alignment governs in case of conflict. The original module source remains operative where not contradicted.
Central governance	Module 7 is a continuous operational backbone; it is not a gate to be completed after Module 6.
Authority	Documented GM-led delegation and owner-reserved matters replace generic or inconsistent old “Management alone” labels.
Scope of this module	Issue controlled technical documents, coordinate applications and corrections, track permits and enforce contractor-dependent statutory mobilization gates.

1. Implementation interpretation and source preservation

This document intentionally retains the complete existing revised module specification after this amendment. Do not erase earlier workflow, screenshots, forms, stages or user-approved protections. Configure the shared functions from the V3 Master Architecture and Module 7 specification. The addendum is not permission to skip work or approvals.

2. Shared mandatory company controls

- GOV-01 Governance: The owner retains reserved strategic powers and protected oversight, while the employed General Manager (GM) holds company-wide operational accountability. Owner access to reporting does not authorize routine operational interference.
- GOV-02 Delegation: Department heads, Project Managers and designated officers may authorize decisions only within documented project, function, category, value and risk limits; above-limit or exceptional decisions go to GM. No employee may approve their own originating action.
- GOV-03 Technical independence: Valid safety and professional certifications are performed by competent authorized persons; neither a GM nor a financial waiver can substitute for a mandatory technical/statutory clearance.
- GOV-04 Evidence: Worker, junior designer, client, storekeeper, inspector, supplier and auditor original submissions are preserved with authorship, timestamp, linked versions and tamper-evident history. Review adds new records; it does not overwrite originals.
- GOV-05 Segregation: Requests, verification, approval, payment, receipt and audit must be appropriately independent. Where team size makes perfect separation impractical, a documented compensating review by an independent qualified officer is mandatory.
- GOV-06 Client access: Client portal content is limited to that client/project and expressly published revision; source design files, worker complaints, confidential pay, internal contracts and audit cases remain restricted.

- GOV-07 Controls: Accounts verifies funds/beneficiaries and books actual transactions; QS values cost and forecasts; Contracts verifies commercial entitlements; Compliance oversees obligations; QA checks systemic quality; independent audit observes, investigates and independently verifies closure.
- GOV-08 Exceptions and continuity: Documented financial/administrative exceptions may be decided by the authorized delegated manager or GM; there is no exception to mandatory law, safety, professional status or an already-required client acceptance. GM absence invokes only preapproved and HR-activated acting authority.

3. Updated operating workflow and stage gates

Applicability

Approvals Officer and Compliance establish project-specific county, NEMA, NCA and other applicable obligations from verified official requirements.

Issue set

Lead professionals sign/certify only appropriate scope; Approvals Officer manages copies, uploading and portal logistics.

Fee

Client pays authority directly with evidence or Mathmag pays through Accounts after delegated authorization.

Corrections

Authority observations route to discipline head, who assigns junior; revised documents pass qualified technical review and resubmission trail.

Conditional completion

Planning approvals may permit conditional Module 4 completion while contractor-dependent NCA or other compliance conditions stay open.

Release

Approvals Officer uploads official result internally; authorized management releases exact approved copies to client.

4. Module-specific accountability integration

CONTROL AREA	REQUIRED V3 BEHAVIOR
Central regulatory register	Module 7 Compliance holds global obligations and expiry/change register; Approvals Officer owns application-specific case evidence.
Professional stamping	Only eligible professional signs/stamps personally; management and printing officer cannot impersonate professional credential.
Fees/receipts	Accounts verifies direct fees and Mathmag-paid authority charges independently of Approvals Officer.
Client publication	Management delegation governs release after officer upload; only PDFs/images for client portal.
Construction gate	Conditional planning stage is not proof of NCA / required clearances; Module 6 remains locked until project requirements complete.

5. Conflict resolution register

OLDER / AMBIGUOUS WORDING	V3 INTERPRETATION
Approvals Officer “manages compliance”	Officer coordinates cases, while Module 7 Compliance oversees company-wide register and independent confirmation.
Module 4 “complete” status	Use distinct planning-complete, pending contractor-related obligations and construction-cleared states.

6. Developer data extensions / shared links

Maintain one stable ProjectId across all modules; preserve exact FileVersionId and client publication authorization, verify role scope server-side and append actor/timestamp/decision history for every state transition.

- StatutoryObligation/Applicability
- AuthorityApplication
- PermitCase/Submission
- ProfessionalCertificate
- FeePaymentEvidence
- CorrectionNotice/Resubmission
- StageCompletion
- PublicationGrant
- AuditEvent

7. Mandatory integration acceptance tests

AT-04-01: No valid Module 3 release prevents opening a normal Module 4 case.

AT-04-02: Unauthorized officer cannot stamp/sign technical certification.

AT-04-03: County approval cannot silently mark NCA complete.

AT-04-04: Overdue expiry creates compliance alert but does not erase permit evidence.

AT-04-05: Rejected revision cannot overwrite stamped approved original.

AT-04-06: Construction mobilization blocked on outstanding statutory prerequisites.

8. Required developer references

Read this PDF with 00 Master Architecture, Module 07 Central Administration and 08 Integration & Testing. Additional authoritative user decisions for Modules 1-6 prevail over older illustrative implementation examples where the later decision is more specific. Regulatory obligations must be validated with qualified advisors and current official sources before implementation.

MATHMAG BUILDERS LIMITED

MANAGEMENT SYSTEM

MODULE 04

PRINTING, STAMPING & APPROVALS

Controlled issue sets • Authorized professional certification • County/NEMA/NCA tracking

Plan better, build better.

Organization	Mathmag Builders Limited
Purpose	Revised developer-ready functional specification
Revision	2.0 | 24 October 2026
Approval basis	Confirmed business choices + clearly identified technical implementation recommendations
System scope	Module 04 of 06, on one persistent client/project platform

IMPLEMENTATION RULE

This revision replaces inconsistent stage assumptions in earlier drafts. A confirmed business decision is binding; illustrative fields, example APIs and implementation details must be validated in design review.

01 Purpose and statutory boundary

Coordinate printing, professional certification, authority applications and controlled release of approved documents.

Stage entry	Management releases the project after Module 3 acceptance and payment gate, for clients whose service scope includes approvals.
Coordinating officer	Dedicated Approvals Officer handles document logistics, authority follow-ups and correction routing.
Professional certification	Only appropriately authorized professionals can sign/stamp/certify documents within their scope.
Statutory fees	Either client pays authority directly with recorded evidence, or Mathmag coordinates through Accounts under approvals.
Authority follow-ups	System reminds Approvals Officer of scheduled visits/calls; officer performs follow-up and records outcomes.
Corrections	Approvals Officer sends comments to responsible department head; head delegates, approves corrected technical issue and authorizes resubmission package.
Client publication	Officer uploads official responses/approved docs internally; management explicitly authorizes client release.
Conditional closure	Required planning approvals may be complete while contractor-dependent NCA project registration remains open and tracked.

MANDATORY CONTROL

No professional stamp is generated or applied automatically by the application. Conditional Module 4 completion is not construction mobilization authorization.

02 End-to-end approvals workflow

01	Management	Releases accepted, financially cleared and versioned proposal from Module 3.
02	Approvals Officer	Assesses project-specific approval obligations and submission checklists.
03	Approvals Officer + Professionals	Prepares controlled print/digital packages; legally authorized professionals review and certify.
04	Approvals Officer	Lodges application through appropriate authorized channel and captures reference/proof.
05	Accounts / Client	Records statutory fee payment evidence according to agreed route.
06	Approvals Officer	Tracks authority response and follow-up schedule; logs each visit/call/outcome.
07	Department Leads	Receive correction instructions, delegate work, technically approve revised files.
08	Approvals Officer	Resubmits certified revised application package and tracks outcome.
09	Management	Authorizes exact final approved PDFs/images for client publication.
10	System	Marks applicable planning approvals complete; keeps any contractor-dependent NCA obligation pending.

03 Responsibility and permission matrix

Approvals Officer	Package assembly, checklists, printing coordination, applications, case logs, deadline follow-up, routed corrections, internal evidence upload; not allowed to stamp technical documents or publish direct to client.
Lead Architect / Engineers	Own discipline-specific technical corrections and professional approval/certification by persons appropriately authorized.
Lead QS	Reviews pricing, quantity and documentation implications of authority comments.
Accounts	Verifies statutory payments, approved disbursements, receipts and balances; no technical certification.
Management	Assigns cases, oversees blockers, authorizes client publication, releases next business stage.
Client	Views only documents published for own project and may upload fee receipts directly when paying an authority.
Contracts Officer / Project Manager	Receive contractor-related approval dependencies in Modules 5/6, but cannot bypass missing statutory conditions.

04 Application applicability matrix

• Assess County Government approvals and any relevant environmental, construction registration or other applicable authority requirements on a project-by-project basis.

• Store status as Not Applicable, Required-Not Started, In Preparation, Submitted, Corrections Requested, Approved, Rejected or Deferred with documented reason.

• Do not assume every project needs every listed approval, and do not assert legal exemption without appropriately recorded project-specific assessment.

• Planning applications can run in parallel when lawfully permitted and their inputs are ready; dependent actions remain blocked until prerequisites are satisfied.

• Contractor-dependent NCA project registration is a separate obligation that may be pending while relevant planning approvals are complete.

• A client who buys design-only or printed documents may have no Module 4 application workflow; mark skipped by service scope rather than artificially complete.

05 Document issue set, printing and stamping

Approved sources	Use exact Module 2 discipline versions and Module 3 accepted proposal snapshot.
Issue manifest	List drawing numbers, revision, discipline, issue date, required print quantity, file hash, recipient and application.
Certification queue	Separate technical approval from authorized physical/digital professional signature/stamp; require proof by signatory.
Print records	Supplier, print order, receiving officer, print batch, issue set and delivery evidence.
Superseded files	Disallow selection of outdated files without a logged sanctioned revision workflow.
Client-facing copies	After management authorization, publish only selected official PDF/image documents, never internal native working files.

06 Government application and payment management

Application files

• Create authority-specific case with applicant/owner, property parcel/county, relevant professionals, application type, current package and tracking/reference number.

• Upload official submission receipt, payment voucher, authority portal acknowledgement, permit/approval and correspondence as immutable evidence.

• Keep authority decision chronology and all fee demands; date future follow-ups rather than relying on memory.

Two permitted statutory fee routes

• Direct client payment: record invoice/instructions, client-uploaded proof, authority confirmation and financial responsibility.

• Mathmag-coordinated payment: Approvals Officer initiates fee request, authorized management expenditure gate applies, Accounts disburses and verifies receipts.

• Never mark a fee paid solely because an upload exists; verify against authority or trusted payment evidence when available.

07 Follow-ups, corrections and resubmission

01	Notice Received	Approvals Officer records official comment letter, date, authority and document revision affected.
02	Issue Classified	Match each item to Architectural, Structural, Mechanical, Electrical, QS or administration.
03	Department Lead Allocates	Responsible head assigns junior correction work and deadline; preserve original notice.
04	Lead Technically Reviews	Corrected files and any required professional re-certification are approved.
05	Cross-Module Impact Review	Assess whether design, cost, client acceptance or contract obligations change.
06	Approvals Officer Resubmits	Create revised submission manifest and upload official resubmission proof/reference.
07	Authority Outcome Tracked	Mark approved, additional corrections or rejection, with dates and evidence.

MANDATORY CONTROL

Approvals Officer must not directly change approved technical design files or treat an authority comment as client authorization for a material scope variation.

08 Conditional completion, NCA dependency and Module 5/6 gates

• Module 4 can reach Planning Approvals Complete / Contractor Registration Pending when applicable design/planning permits are available but contractor details are not yet finalized.

• Manage NCA project registration and contractor appointment information as a separate compliance work item triggered by later execution of the applicable contract.

• Project Manager may open Module 6 preconstruction planning after an executed construction agreement, but physical mobilization remains locked until all required registration, approvals, financial gates, readiness assessment and management release.

• For design-only clients or clients appointing another contractor, approvals and contractor-registration responsibility must be documented accurately in the relevant engagement; Mathmag cannot override requirements placed on the responsible parties.

• Management authorizes formal publication to the client portal after internal approval evidence has been checked.

• Any late authority corrections that affect client-accepted scope, cost, programme or construction works must trigger controlled cross-module impact checks.

09 Controlled release to client portal

• Approvals Officer uploads approved documents to internal case record with issuing authority, reference, date, stamped version and validation evidence.

• Management sees preview, manifest and list of outstanding approvals before authorizing exact file-level publication.

• Client portal shows explicit status and disclaimers for pending obligations; never show NCA project registration as approved when still open.

• Publication can be revoked or superseded only through traceable actions, not deletion of evidence.

• Professional and county documents retain their authentic original appearance and may not be recreated as simulated official permits.

10 Shared rules carried across all six modules

One lifecycle record	Maintain one project ID from confirmed site-visit booking through design, approvals, contracts, construction and post-handover. Never create a disconnected project just to open a new module.
Role separation	User role, project assignment and explicit approval authority determine every permitted action. Technical sign-off, financial validation, management approval and client acceptance are distinct records.
Evidence integrity	Preserve original submissions, attachments, timestamps, authors and immutable decision histories. Corrections create new records or versions; no silent overwriting.
Selective client access	Client accounts can access only their own projects and explicitly authorized files or updates. Internal working/source files, staff performance data and financial notes are never published by default.
Conditional service scope	Clients may purchase design only, printing only, approvals, technical supervision, labour-only building or full construction. Modules not contracted are not mandatory project steps.
Management-controlled exceptions	Any permitted exception requires identified management authorization, reason, date and retained evidence. Mandatory legal/technical clearances cannot be overridden.
Security and audit	Require authenticated accounts, least privilege, encrypted transport/storage, file scanning, access logs, project-scoped permissions, backups and recoverability.

11 Screens and user journeys

Approvals Dashboard	Cases by authority, due action, stage and responsible officer.
Application Checklist	Project-specific applicability of County/NEMA/NCA/other requirements.
Print and Certification Desk	Version manifest, print orders, professional signatory checklist and signatures/stamps.
Application Timeline	Submission evidence, fee vouchers, authority decisions, follow-up tasks.
Correction Router	Official notice, required discipline, assigned junior, lead approvals, resubmission.
Client Release Queue	Management-authorized selected final PDFs/images.
Compliance Dependency Board	Pending NCA registration and Module 6 preconstruction readiness hold.

12 Core data objects and key relationships

Logical entities for developer schema design. Names below are examples rather than prescribed database table names.

ApprovalRequirement / Case	Authority, applicability, legal basis/reason, project, documents, deadlines, case status.
SubmissionPackage / Manifest	Exact drawing/version hashes, certification signatory proof, print batch, application reference.
AuthorityDecision / CorrectionNotice	Date, authority text/evidence, affected discipline and version, next action.
FeeDemand / FeePayment	Amount, authority, paid-by route, accounts verification and evidence.
FollowUpAction	Date, owner, reminder, method, outcome and next scheduled date.
ProfessionalCertification	Professional identity/authority, scope, document version, signed proof and date.
ClientPublication / StageDependency	Published official items, manager authorization, NCA pending or completed state.
AuditEvent	Complete non-destructive file/version and decision trail.

13 Illustrative service and event contracts

Suggested API/service boundaries for planning. Authentication, validation, permission checks, idempotency and audit metadata apply to all write operations.

Open approval case	POST /projects/{id}/approval-cases from Module 3 release.
Add submission evidence	POST /approval-cases/{id}/submissions.
Schedule follow-up	POST /approval-cases/{id}/follow-ups, reminder event.
Route authority correction	POST /approval-cases/{id}/correction-notices -> department task.
Record professional cert	POST /documents/{version}/certifications with authorized evidence.
Management publication	POST /approval-cases/{id}/client-publications.
Events	ApplicationSubmitted, AuthorityCommented, AuthorityApproved, PlanningApprovalsComplete, NcaRegistrationPending, NcaRegistrationVerified.

14 User acceptance tests and release criteria

• TEST 01 - Approvals Officer cannot add simulated professional certification or publish client documents directly.

• TEST 02 - Client-pay and Mathmag-pay statutory fee pathways keep evidence and accounts states distinct.

• TEST 03 - Authority correction returns to the correct department head, preserves original approved versions and triggers cost impact checks.

• TEST 04 - Conditional Module 4 completion can coexist with pending contractor-specific NCA registration.

• TEST 05 - Module 6 physical mobilization cannot occur simply because county planning approvals are complete.

• TEST 06 - Print-only/design-only client can exit without being forced into authority applications.

• TEST 07 - Management must authorize every published final approval document.

• TEST 08 - Resubmission has new manifest/reference and retains prior authority responses.
